PROJECTS

AnimeNex
https://animenex.netlify.app/

AnimeNex is an application that helps individuals decide what anime to watch next. Individuals select a specific genre they want to watch, and based on their selection, they will receive several different anime recommendations. Each anime recommendation comes in a card that details the titles, image, synopsis, and a random quote from the anime. Users can click to flip over the cards to read the synopsis of that anime. This project was created over the span of a week as a group project.
Code: https://github.com/em-yee/anime-watch-quiz | **Technologies**: *HTML, CSS, Bootstrap, JavaScript*

PokéTeams
https://poketeams.netlify.app/

PokéTeams is a front-end web application built using React and Redux. This site allows the user to create a Pokémon Team, as well as view more information about each Pokémon. This project was created over the span of a week as an individual project.
Code: https://github.com/em-yee/PokeTeams | **Technologies**: *HTML, CSS, JavaScript, ES6, React.js, Redux*

BTS Discography Site
https://young-sea-94895.herokuapp.com/

This site allows users to check out BTS's (the K-POP group) discography, along with messages on the message board. This project was created over the span of a weekend as an individual project.
Code: https://github.com/em-yee/bts-site | **Technologies**: *HTML, CSS, JavaScript, EJS*
